

Support and Inclusion of students with disabilities at higher education institutions in Montenegro

Report: Dissemination of project, presentation on MECO IEEE regional conference

18th June 2015 - Budva, Montenegro

During MECO conference in Budva project were presented to visitors. Srdjan Jovanovski has made comprehensive introduction to participants about results of the project in the past three years. He explained all technical and administrative aspects that are implemented. He highlighted the importance of integration of student services on universes and AYDM and also explained to participants about way of usage of Student advisory office. He also have made accent at the technical services implemented to help students with disability. He noted the importance of adopted web sites of universities and AYDM. Listeners could see how adopted versions of web sites work and they can try it from any browser.

He made very colorful presentation of usage of modern technologies on UNIM. He also presented e-learning platform which is very useful for students because it allows them to listen, or watch lectures whenever they want and as many time as they need.

Support and Inclusion of students with disabilities at higher education institutions in Montenegro

It is also presented teaching material that is adopted for students with hearing and vision defects. During the project two books, one from the area of economy and one from the area of law are adopted. Students can use special equipment that is available to students with disability. Teaching materials is adopted with usage of the equipment. Also it is highlighted that each professor and assistant has passed courses for work with students with disability and they are all trained how to prepare materials for the students with specific disability.
